ENHANCING THE CUSTOMER SHOPPING EXPERIENCE

Retail Storefronts—NanaWall Systems Brings the Shop to the Shopper

The storefront is the first line of branding that reflects a company's unique image. An open storefront eliminates barriers and draws in customers. A NanaWall opening glass wall creates a wide, seamless transition between street and store—bringing the shop to the shopper before they ever cross the threshold.

- Immediately engage customers with product and personnel through wide-open NanaWall opening glass walls.
- Expand display areas by utilizing street fronts, sidewalks, and mall walkways to display movable racks and bins that roll easily through the spacious opening.
- Increase sales by eliminating psychological as well as physical barriers. Shoppers attracted to colorful displays are readily drawn deep into the store.
- Leave the lights on after hours for extra security and allow tomorrow's buyers to view enticing merchandise as they stroll by.

CREATE RETAIL SYNERGY FOR TENANTS AND THEIR CUSTOMERS

NanaWall Systems and the Restaurant Venue—A Clear Dining Pleasure

Opening the restaurant façade to the surroundings allows passersby to immediately observe the restaurant's ambience and food. A NanaWall system provides additional seating space when open and comfort, security, and energy efficient weather protection when closed, without sacrificing open views.

- Increase seating capacity and boost revenue by opening NanaWall opening glass walls onto the street, patio, or balcony.
- Facilitate free-flowing customer traffic by replacing the physical barrier between the street and the restaurant.
- Create unique and memorable indoor/outdoor dining atmospheres for shoppers to enhance and extend their shopping experiences.
